

# IMUMAX Nasal Spray Leaflet

*Imumax Nasal Spray* is for the treatment of Rhinitis, Rhinosinusitis, & Nasal congestion

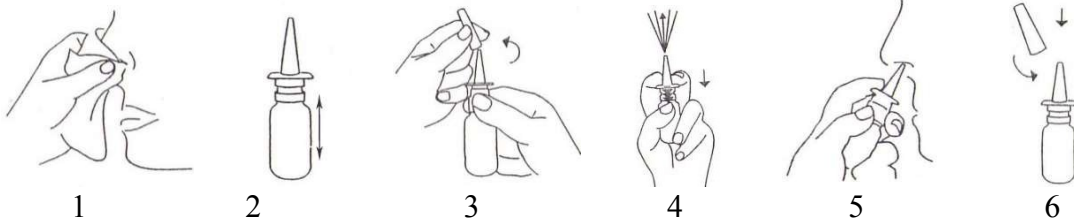

**PRESENTATION:** 15 ml Spray.

**COMPOSITION:** Glycerol, Aqua, Hydroxypropylcellulose, and association of essential oils of Eucalyptus globulus, Mentha piperita Rosmarinus officinalis, and Thymus satureioides.

**MODE OF ACTION:** *IMUMAX Nasal Spray*, is a filmogen, osmotically active, hypertonic solution for nasal spray. *IMUMAX Nasal Spray* forms a film over the nasal mucosa and sinus openings. The osmotically active film instantly attracts hypotonic fluid present in the deeper parts of the mucosa and creates a stream of hypotonic fluid from the inside outwards. This mechanical effect detaches and drains all contaminants present in the nasal cavity including free virus particles & bacteria, and decongests the nasal passage. The osmotic pressure may also help open & clean the sinuses, thereby reducing intra-sinus pressure and pain. The film formed by *IMUMAX Nasal Spray* also protects the nasal surface from dryness, irritation and external aggressions. These product properties help provide nearly instant symptomatic relief.

**DIRECTIONS:** For topical use only.

- 1 – Blow your nose thoroughly before using the product
- 2 - Shake the bottle
- 3 - Remove the protective cap
- 4 - Press the sprayer once or twice until a fine mist of product appears
- 5 - Insert the nozzle into one nostril and spray the product by pressing on the sprayer. Apply 2 or maximum 3 sprays in each nostril, 2-3 times per day or more if necessary, until complete recovery
- 6 – Close the bottle with the cap after each use.

**PRECAUTIONS:** Read the instructions leaflet carefully. Wash hands before use. The product is for topical nasal spray only.

Check the list of ingredients and do not use the product if you are allergic or sensitive to any of those ingredients.

The mode of action of *IMUMAX Nasal Spray* is due to instant osmosis and may produce slight tingling or irritation during the first 10-15 minutes following each product application. However, if the irritation is too strong or persists for a long period of time, we recommend that you stop using the product as you may be allergic to one of the ingredients used to prepare *IMUMAX Nasal Spray*. The product exerts its effect about 10-15 minutes after application with a significant nasal discharge. Do not reapply the product during this period. The nasal discharge can last up to 4-6 hours depending on the severity of initial nasal congestion.

Seek medical advice if the symptoms persist with no improvement within 7 days of use of *IMUMAX Nasal Spray*.

Keep out of reach and sight of children. Keep at room temperature. Do not refrigerate. Close the bottle with the plastic cover after each use. Do not use the product after the expiry date or more than 30 days after 1<sup>st</sup> use, or if the container is damaged.

This product does not contain any harmful ingredient. As the safety of these ingredients has not been established clinically in young children and in pregnant or breastfeeding women, and in the absence of sufficient data, we do not recommend using this product in children below the age of 12, or during pregnancy or breastfeeding without medical advice.

## **SIDE EFFECTS:**

*IMUMAX Nasal Spray* has no known side effects and is not dangerous if swallowed. If you observe an allergic type of reaction, cease using the product and flush your nose with saline solution or fresh water, and eventually consult a medical professional.
